Claims Allowed

Claims 1-20 are allowable over the prior art of record. The claims are allowed because the prior art does not anticipate nor render obvious the invention of an automatic transmission including a housing with a support portion and a coupling portion proximate the support portion, a gear transmission disposed in the housing having at least on hydraulic actuator controllable to provide a plurality of speeds, a transmission throttle valve operable to regulate the hydraulic pressure, the throttle valve including a throttle valve shaft proximate the coupling portion, and an electromagnetic actuator coupled to the support portion of the housing, the actuator also operably coupled to the throttle valve shaft.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information

Disclosure Statement filed December 17, 2003. None of the references cited show all of the features of the claimed invention.

The reference cited by the examiner is deemed pertinent to applicant's disclosure. McKee '055 shows a rotary valve 22 driven by a stepper motor 24. Controller 30 controls the motor.

McKee doesn't show transmission throttle valve controlled by an electromagnetic actuator as required by the claims.
